* Automatic, fuel-injected vehicles only

All Python Security Systems Come With the Following Standard Features: **

- Clone-Safe™ 66-bit Super Code Hopping™ • High Security Disarm
- Soft Chirp® • Failsafe® Starter Kill • Active/Passive Arming
- Stinger® Doubleguard® Shock Sensor • Remote Valet®
- Forced Passive Arming • Automatic Engine Disable (AED)
- Revenger® Six-Tone Siren • Warn Away® • Status LED
- Nuisance Prevention® Circuitry (NPC™) • Silent Mode™
- GPP Nationwide Guaranteed Protection Plan
- Learn Routine™ • Ignition-Controlled Door Locks
- True Alarm™ Technology • Parking Light Flash
- Progressive Door Trigger • Panic (Car Locator)

**Some features not available on all systems

Years of experience makes

PYTHON®

your best choice in
auto security.

Python won't let you down when it really counts.

Python's one-year Guaranteed Protection Plan is the most generous in the industry. It refunds your insurance deductible up to \$2,500 if your car is stolen with Python installed and armed - *whether your vehicle is recovered or not*. All Python systems are covered by a limited lifetime warranty for the original owner of the original vehicle. See your dealer for details and to get the best security system available.

The Company Behind

Python Security Systems

Directed Electronics, Inc. registered in the ISO-9001 quality standard, is America's Favorite Security Company, with more than 100 patents and Innovations Awards. Directed's engineers are committed to offering consumers the most technologically sophisticated electronic systems available today.

**AUTO SECURITY
AND CONVENIENCE SYSTEMS**

Let a PYTHON[®] be Your Guide

Because it's a jungle out there, you need Python. It's the vehicle security system that protects you and your vehicle with today's most advanced technologies.

Nothing outsmarts a PYTHON.

In fact, Python systems are so intelligent, they adjust themselves instantly to external conditions such as thunder, jackhammers and airport noise. Python only strikes back at criminals when there's an actual threat - its six-tone Revenger siren blows thieves away! ** Volume-adjustable chirps and flashing parking lights confirm that your vehicle is protected every time you arm and disarm.

Nothing outperforms a PYTHON.

Python's high-tech ESP, HP and XP systems give you all the modern conveniences of today's leading technologies, and are specifically designed to make operation ultra-convenient. Your Python can lock, release, open, close, start and enable virtually anything in your vehicle. It lets you decide if you want to activate your security system automatically with last-door passive arming, or actively, using your transmitter each time you leave the vehicle. That's safety and convenience. Each Python is so reliable, it's guaranteed in writing and through warranty for the life of your vehicle!

PYTHON wraps your car in security

Every sophisticated Python system offers the performance and quality you have come to expect from Python. Python systems are truly security for the best!

Python Security

PYTHON security and convenience systems offer full ESP2 features:

- Owner Recognition: Your vehicle recognizes your transmitter, and the transmitters of other authorized users, adjusting and configuring itself according, with individually programmed system features for up to 4 separate drivers.
- Icon Remotes: Configure the system with separate buttons for lock and unlock - or any way you choose!
- Ghost Switch: Hide your valet override switch in plain sight, where no thief will ever find it!
- Flex Channel: An extra channel to configure any way you want.
- Bitwriter Programmable: Full-featured digital programming.

Python Keyless Entry

- Limited Lifetime Warranty
- Failsafe Starter Kill
- Nationwide Guaranteed Protection Plan (GPP)
- Every Python system features 66-bit Clone-Safe Code-Hopping

SHF, XHF and HF+

New state-of-the-art off board super-heterodyne and super-regenerative receivers offer Python's best range ever! If range is important to you, Python systems with SHF and XHF offer the best range in the industry!

Remote Start

Every Python remote start system features either SHF or XHF superheterodyne receivers, for extreme range!

- Stay warm in the winter, and cool in the summer!
- Rugged High Capacity Relay Satellite (HCRS)
- Diesel mode with dedicated glow plug input
- Bitwriter programmable run time: 1-60 minutes
